TECH CHAMPIONS ASSESSMENT TEST

Programming Language – PHP/Laravel
Time – 2hrs

PROGRAMMING TASKS

This project is aimed to test your knowledge and expertise on PHP and Laravel Framework. You are required to create a new PHP/Laravel Project with the name **'Skillznet'**.

The Skillznet Project is a simple project that will have a login page, a sign up page and a dashboard page. You should be able to perform the following functionalities on the Skillznet website:

1. Account Sign Up – Users should be able to sign up by filling in their information on the sign up page. You are given a sample image screenshot with the name 'register.png'. This sample screenshot shows how the sign up page should be designed. Follow the sample given to you and redesign the registration page exactly as it is given to you.

2. Account Sign in – Registered users should be able to login to their account by entering their username and password. You are given a sample image screenshot with the name 'login.png'. This sample screenshot shows how the login page should be designed. Follow the sample given to you and redesign the login page exactly as it is given to you.

3. Account Dashboard – When the users login, they should see a dashboard that shows their profile and account information. For this dashboard page, you are not given any sample. You are required to come up with a design of how the dashboard page should look like.
